RECEIVED NYSCEF: 07/23/2021

Plaintiff, Village of Johnson City, ("Plaintiff"), by and through its undersigned counsel, hereby files this Complaint against Defendants, 3M COMPANY, f/k/a Minnesota Mining and Manufacturing Co., AGC CHEMICALS AMERICAS INC., AMEREX CORPORATION, ARKEMA INC., ARCHROMA U.S., INC., BASF CORPORATION, BUCKEYE FIRE EQUIPMENT COMPANY, CARRIER GLOBAL CORPORATION, CHEMDESIGN PRODUCTS INC., CHEMGUARD INC., CHEMICALS, INC., CLARIANT CORPORATION, CORTEVA, INC., DEEPWATER CHEMICALS, INC., DUPONT DE NEMOURS INC., DYNAX CORPORATION, E. I. DUPONT DE NEMOURS AND COMPANY, KIDDEFENWAL, INC., NATION FORD CHEMICAL COMPANY, NATIONAL FOAM, INC., THE CHEMOURS COMPANY, THE CHEMOURS COMPANY FC, LLC, and TYCO FIRE PRODUCTS LP, and DOE DEFENDANTS 1-20, fictitious names whose present identities are unknown (collectively "Defendants") and alleges, upon information and belief, as follows:

INTRODUCTION

- 1. This action arises from the foreseeable contamination of groundwater caused by the use of aqueous film-forming foam ("AFFF") products that contained per- and poly-fluoroalkyl substances ("PFAS"), including perfluorooctane sulfonate ("PFOS") and perfluorooctanoic acid ("PFOA").
- 2. PFOS and PFOA are fluorosurfactants that repel oil, grease, and water. PFOS, PFOA, and/or their chemical precursors, are or were components of AFFF products, which are firefighting suppressant agents used in training and firefighting activities for fighting Class B fires. Class B fires include fires involving hydrocarbon fuels such as petroleum or other flammable liquids.
- 3. PFOS and PFOA are mobile, persist indefinitely in the environment, bioaccumulate in individual organisms and humans, and biomagnify up the food chain. PFOS and PFOA are also

ILED: BROOME COUNTY CLERK 07/23/2021 12:28 PM INDEX NO. EFCA2021001849

NYSCEF: 07/23/2021

RECEIVED RESCENT

associated with multiple and significant adverse health effects in humans, including but not limited to kidney cancer, testicular cancer, high cholesterol, thyroid disease, ulcerative colitis, and pregnancy-induced hypertension.

- 4. At various times from the 1960s through today, Defendants designed, manufactured, marketed, distributed, and/or sold AFFF products containing PFOS, PFOA, and/or their chemical precursors, and/or designed, manufactured, marketed, distributed, and/or sold the fluorosurfactants and/or perfluorinated chemicals ("PFCs") contained in AFFF (collectively, "AFFF/Component Products").
- 5. Defendants designed, manufactured, marketed, distributed, and/or sold AFFF/Component Products with the knowledge that these toxic compounds would be released into the environment during fire protection, training, and response activities, even when used as directed and intended by Defendants.
- 6. Since its creation in the 1960s, AFFF designed, manufactured, marketed, distributed, and/or sold by Defendants, and/or that contained fluorosurfactants and/or PFCs designed, manufactured, marketed, distributed, and/or sold by Defendants, was sold to municipal airports, such as United States Airforce Plant 59, used as directed and intended by Defendants, and subsequently released into the environment during fire protection, training, and response activities, resulting in widespread PFAS contamination. AFFF products containing PFAS were purchased, consumed, used, mixed, stored, handled, transported, discharged, released, and/or disposed of at United States Airforce Plant 59 ("USAF Plant 59").
- 7. Defendants' AFFF/Component Products have been used at USAF Plant 59 for more than 45 years in routine training and emergency activities, allowing PFOS/PFOA to travel to the surrounding groundwater, causing contamination of various of Plaintiff's water supply wells.

ILED: BROOME COUNTY CLERK 07/23/2021 12:28 PM INDEX NO. EFCA2021001849

Case 3:21-cv-00927-TJM-ML Document 2 Filed 08/17/21 Page 5 of 51

REGETVED NYSCEF: 07/23/2021

8. PFAS leached into the air, soil, and groundwater at and surrounding the USAF Plant 59, contaminating the environment, and poisoning the groundwater on and off site. The resulting PFAS contamination has impacted three public water supply wells turning them inoperable.

- 9. Plaintiff's wells draw from 4 well sites (wells 2, 3, 6, and 7) and distributes to 4 holding tanks. Plaintiff also distributes water to 4 Broome County tanks.
- 10. Plaintiff's main plant on Camden Street draws water out of two wells (wells 2 and3) and goes through a stripping tower process.
- 11. Plaintiff's supply wells (wells 2, 3, and 5) are inoperable due to levels of contamination of PFOA and PFOS. Moreover, wells 6 and 7 have PFOA and PFOS detection levels.
- 12. New York State has established a MCL of 10 parts per trillion (ppt) each for PFOA and PFOS in public drinking water supplies. This new standard went into effect in August 2020.
- 13. In testing conducted by Plaintiff in 2020, supply wells have shown detectable levels of PFAS, including levels which are close to the above MCL.
- 14. Specifically, in November 2020, Well 2 and 3 had a combined PFOA/PFOS concentration of 2.223 ppt. Moreover, Well 6 showed a combined detection of 3.58 and Well 7 showed a combined detection of 2.033 ppt.
- 15. On information and belief, the above contamination is a direct and proximate result of repeated, long-term and widespread AFFF that sold and distributed by the Manufacturing Defendants, and were applied, discharged, disposed of, or otherwise released at various locations, at various times, and in various amounts onto the lands and/or water in the vicinity of the Village of Johnson City.

INDEX NO. EFCA2021001849 Filed 08/17/21 Page 6 of 51 RECEIVED NYSCEF: 07/23/2021

16. In order to ensure that it can continue to provide clean and safe water to residences

and businesses, Plaintiff has and will continue to take action to address the above contamination

of its property and its potable water supply, caused by the Defendants.

Such action includes, but is not limited to, additional testing and monitoring for 17.

PFAS, planning, designing, purchasing, installing and maintaining water filtration systems to

remove these chemicals, infrastructure modifications, contingency planning, public notice and

outreach.

18. Due to the persistent and long-term nature of PFAS contamination, Plaintiff is

expected to suffer damages and incur the costs associated with these and other necessary remedial

actions for many years to come.

19. In order to assure safe drinking water to its residents, Plaintiff has turned inoperable

three of its public wells and will need to incur in costs for mitigating the impact of water containing

any PFAS; for example, installation of any treatment or remediation systems, including GAC,

reverse osmosis, ion exchange systems, discontinuing use of wells, drilling of additional or new

wells, securing alternative water sources, providing bottled water, point of entry or other treatment

or filter systems to customers.

20. These and other costs will be incurred by Plaintiff as a direct and proximate result

of Defendants' wrongful acts and omissions.

21. The Village of Johnson City should not have to bear these costs; they should be

borne by the Defendants, who are responsible for the PFAS contamination.

JURISDICTION AND VENUE

22. This case is properly venue in this Court pursuant to CPLR §§ 503(a) and (c) due

to the residence of Plaintiff and at least one of the Defendants, the place where the cause of action

arose.

5

ILED: BROOME COUNTY CLERK 07/23/2021 12:28 PM INDEX NO. EFCA2021001849

Case 3:21-cv-00927-TJM-ML Document 2 Filed 08/17/21 Page 7 of 51

REGET VED NYSCEF: 07/23/2021

23. Furthermore, venue is proper pursuant to CPLR § 507, because the judgment demanded would affect the possession, use or enjoyment of real property situated in the County of Broome.

24. Upon information and belief, this Court has personal jurisdiction over Defendants because each of them is doing business in New York by manufacturing, distributing, producing and marketing products, services and/or materials in this State and/or to this State.

25. At all relevant times to the Complaint, Defendants conducted business in New York and thereby availed themselves of the legal rights in New York.

26. Defendants have had systematic and continuous commercial contacts with New York to establish jurisdiction over them pursuant to CPLR § 302.

27. This Court has personal jurisdiction over the defendants as each of them are doing business in New York and engage in business in New York such that it is reasonably foreseeable that they would be subject to the jurisdiction of the courts of this State.

PARTIES

A. Plaintiff

28. The Village of Johnson City is a municipal corporation duly organized and existing by virtue of the laws of the State of New York with its principal place of business at 243 Main Street, Johnson City, NY 13790.

29. Plaintiff is supplies potable water to residents and customers in the exercise of its powers, duties and responsibilities as a local governmental entity. Currently, the Village of Johnson City Water Department serves 5,590 metered accounts.

30. In carrying out its duties, Plaintiff is acting for the benefit of the public and for the protection of the health, welfare and prosperity of its customers.

B. Defendants

- 31. The term "Defendants" refers to all Defendants named herein jointly and severally.
 - i. The AFFF Defendants
- 32. The term "AFFF Defendants" refers collectively to Defendants 3M Company, Amerex Corporation, Buckeye Fire Equipment Company, Carrier Global Corporation, Chemguard Inc., Kidde-Fenwal, Inc., National Foam, Inc., and Tyco Fire Products L.P.,
- 33. **Defendant 3M Company f/k/a Minnesota Mining and Manufacturing Co.** ("3M") is a corporation organized and existing under the laws of the State of Delaware, with its principal place of business located at 3M Center, St. Paul, Minnesota 55144-1000.
- 34. Beginning before 1970 and until at least 2002, 3M designed, manufactured, marketed, distributed, and sold AFFF containing PFAS, including but not limited to PFOA and PFOS.
- 35. **Defendant Amerex Corporation ("Amerex")** is a corporation organized and existing under the laws of the State of Alabama, with its principal place of business located at 7595 Gadsden Highway, Trussville, AL 35173.
- 36. Amerex is a manufacturer of firefighting products. Beginning in 1971, it was a manufacturer of hand portable and wheeled extinguishers for commercial and industrial applications.
- 37. In 2011, Amerex acquired Solberg Scandinavian AS, one of the largest manufacturers of AFFF products in Europe.
- 38. On information and belief, beginning in 2011, Amerex designed, manufactured, marketed distributed, and sold AFFF containing PFAS, including but not limited to PFOA and PFOS.

REGETVED NYSCEF: 07/23/2021

39. **Defendant Tyco Fire Products LP ("Tyco")** is a limited partnership organized under the laws of the State of Delaware, with its principal place of business located at One Stanton Street, Marinette, Wisconsin 54143-2542.

- 40. Tyco is the successor in interest of The Ansul Company ("Ansul"), having acquired Ansul in 1990.
- 41. Beginning in or around 1975, Ansul designed, manufactured, marketed, distributed, and sold AFFF containing PFAS, including but not limited to PFOA and PFOS.
- 42. After Tyco acquired Ansul in 1990, Tyco/Ansul continued to design, manufacture, market, distribute, and sell AFFF products containing PFAS, including but not limited to PFOA and PFOS.
- 43. **Defendant Chemguard, Inc.** ("Chemguard") is a corporation organized under the laws of the State of Texas, with its principal place of business located at One Stanton Street, Marinette, Wisconsin 54143.
- 44. On information and belief, Chemguard designed, manufactured, marketed, distributed, and sold AFFF products containing PFAS, including but not limited to PFOA and PFOS.
- 45. On information and belief, Chemguard was acquired by Tyco International Ltd. in 2011.
- 46. **Defendant Buckeye Fire Equipment Company ("Buckeye")** is a corporation organized under the laws of the State of Ohio, with its principal place of business located at 110 Kings Road, Kings Mountain, North Carolina 28086.
- 47. On information and belief, Buckeye designed, manufactured, marketed, distributed, and sold AFFF products containing PFAS, including but not limited to PFOA and PFOS.

INDEX NO. EFCA2021001849 2:28 PM Page 10 of 51
RECEIVED NYSCEF: 07/23/2021

48. Defendant National Foam, Inc. ("National Foam") is a corporation organized under the laws of the State of Delaware, with its principal place of business located at 141 Junny Road, Angier, North Carolina 27501.

- 49. Beginning in or around 1973, National Foam designed, manufactured, marketed, distributed, and sold AFFF containing PFAS, including but not limited to PFOA and PFOS.
- 50. On information and belief, National Foam currently manufactures the Angus brand of AFFF products and is a subsidiary of Angus International Safety Group.
- 51. On information and belief, in or around 1988, National Foam merged with Chubb Fire Ltd. to form Chubb National Foam, Inc.
- 52. On information and belief, Chubb is or has been composed of different subsidiaries and/or divisions, including but not limited to, Chubb Fire & Security Ltd., Chubb Security, PLC, Red Hawk Fire & Security, LLC, and/or Chubb National Foam, Inc. (collectively referred to as "Chubb").
 - 53. On information and belief, Chubb was acquired by Williams Holdings in 1997.
- 54. On information and belief, Angus Fire Armour Corporation had previously been acquired by Williams Holdings in 1994.
- 55. On information and belief, Williams Holdings was de-merged into Chubb and Kidde P.L.C. in or around 2000.
- 56. On information and belief, when Williams Holdings was de-merged, Kidde P.L.C. became the successor in interest to National Foam System, Inc. and Angus Fire Armour Corporation.
- 57. On information and belief, Kidde P.L.C. was acquired by United Technologies Corporation in or around 2005.

RECEIVED NYSCEF: 07/23/2021

58. On information and belief, Angus Fire Armour Corporation and National Foam separated from United Technologies Corporation in or around 2013.

59. **Defendant Kidde-Fenwal, Inc. ("Kidde-Fenwal")** is a corporation organized under the laws of the State of Delaware, with its principal place of business at One Financial Plaza, Hartford, Connecticut 06101.

60. On information and belief, Kidde-Fenwal was an operating subsidiary of Kidde P.L.C. and manufactured AFFF following Kidde P.L.C.'s acquisition by United Technologies Corporation.

61. On information and belief, Kidde-Fenwal is the entity that divested the AFFF business unit now operated by National Foam in 2013.

62. **Defendant Carrier Global Corporation ("Carrier")** is a corporation organized under the laws of the State of Delaware, with its principal place of business at 13995 Pasteur Boulevard, Palm Beach Gardens, Florida 33418.

63. On information and belief, Carrier was formed in March 2020 when United Technologies Corporation spun off its fire and security business before it merged with Raytheon Company in April 2020.

- 64. On information and belief, Kidde-Fenwal became a subsidiary of Carrier when United Technologies Corporation spun off its fire and security business in March 2020.
- 65. On information and belief, the AFFF Defendants designed, manufactured, marketed, distributed, and sold AFFF products containing PFOS, PFOA, and/or their chemical precursors that were stored, handled, used, trained with, tested equipment with, otherwise discharged, and/or disposed in and around the Village of Johnson City, New York.

ii. The Fluorosurfactant Defendants

- 66. The term "Fluorosurfactant Defendants" refers collectively to Defendants 3M, Arkema Inc., BASF Corporation, ChemDesign Products Incorporated, Chemguard Inc., Deepwater Chemicals, Inc., E.I. DuPont de Nemours and Company, The Chemours Company FC, LLC, DuPont de Nemours Inc., and Dynax Corporation.
- 67. **Defendant Arkema Inc.** is a corporation organized and existing under the laws of Pennsylvania, with its principal place of business at 900 First Avenue, King of Prussia, PA 19406.
 - 68. Arkema Inc. develops specialty chemicals and polymers.
 - 69. Arkema, Inc. is an operating subsidiary of Arkema France, S.A.
- 70. On information and belief, Arkema Inc. designed, manufactured, marketed, distributed, and sold fluorosurfactants containing PFOS, PFOA, and/or their chemical precursors for use in AFFF products.
- 71. **Defendant BASF Corporation ("BASF")** is a corporation organized under the laws of the State of Delaware, with its principal place of business located at 100 Park Avenue, Florham Park, New Jersey 07932.
- 72. On information and belief, BASF is the successor-in-interest to Ciba Inc. (f/k/a Ciba Specialty Chemicals Corporation).
- 73. On information and belief, Ciba Inc. designed, manufactured, marketed, distributed, and sold fluorosurfactants containing PFOS, PFOA, and/or their chemical precursors for use in AFFF products.
- 74. **Defendant ChemDesign Products Inc.** ("ChemDesign") is a corporation organized under the laws of Delaware, with its principal place of business located at 2 Stanton Street, Marinette, WI 54143.

75. On information and belief, ChemDesign designed, manufactured, marketed, distributed, and sold fluorosurfactants containing PFOS, PFOA, and/or their chemical precursors for use in AFFF products.

76. **Defendant Deepwater Chemicals, Inc. ("Deepwater")** is a corporation organized under the laws of Delaware, with its principal place of business located at 196122 E. County Road 40, Woodward, OK 73801.

77. On information and belief, Deepwater Chemicals designed, manufactured, marketed, distributed, and sold fluorosurfactants containing PFOS, PFOA, and/or their chemical precursors for use in AFFF products.

78. **Defendant Dynax Corporation ("Dynax")** is a corporation organized under the laws of the State of Delaware, with its principal place of business located at 103 Fairview Park Drive, Elmsford, New York 10523.

- 79. On information and belief, Dynax entered into the AFFF market on or about 1991 and quickly became a leading global producer of fluorosurfactants and fluorochemical stabilizers containing PFOS, PFOA, and/or their chemical precursors.
- 80. On information and belief, Dynax designed, manufactured, marketed, distributed, and sold fluorosurfactants and fluorochemical stabilizers containing PFOS, PFOA, and/or their chemical precursors for use in AFFF products.
- 81. **Defendant E.I. du Pont de Nemours & Company ("DuPont")** is a corporation organized under the laws of the State of Delaware, with its principal place of business located at 974 Centre Road, Wilmington, Delaware 19805.

TILED: BROOME COUNTY CLERK 07/23/2021 12:28 PM INDEX NO. EFCA2021001849

RECEIVED NYSCEF: 07/23/2021

82. **Defendant The Chemours Company ("Chemours Co.")** is a limited liability company organized under the laws of the State of Delaware, with its principal place of business located at 1007 Market Street, P.O. Box 2047, Wilmington, Delaware, 19899.

83. In 2015, DuPont spun off its performance chemicals business to Chemours Co., along with vast environmental liabilities, which Chemours Co. assumed, including those related to PFOS and PFOA and fluorosurfactants. On information and belief, Chemours Co. has supplied fluorosurfactants containing PFOS and PFOA, and/or their chemical precursors to manufacturers of AFFF products.

- 84. On information and belief, Chemours Co. was incorporated as a subsidiary of DuPont as of April 30, 2015. From that time until July 2015, Chemours Co. was a wholly owned subsidiary of DuPont.
- 85. In July 2015, DuPont spun off Chemours Co. and transferred to Chemours Co. its "performance chemicals" business line, which includes its fluoroproducts business, distributing shares of Chemours Co. stock to DuPont stockholders. Since then, Chemours Co. has been an independent, publicly traded company.
- 86. **Defendant The Chemours Company FC, LLC ("Chemours FC")** is a limited liability company organized under the laws of the State of Delaware, with its principal place of business at 1007 Market Street, Wilmington, Delaware 19899.
- 87. **Defendant Corteva, Inc. ("Corteva")** is a corporation organized and existing under the laws of Delaware, with its principal place of business at 974 Centre Rd., Wilmington, Delaware 19805.
- 88. **Defendant Dupont de Nemours Inc.** f/k/a **DowDuPont, Inc.** ("Dupont de Nemours Inc.") is a corporation organized and existing under the laws of Delaware, with its

Filed 08/17/21 Page 15 of 51 RECEIVED NYSCEF: 07/23/2021

principal place of business at 974 Centre Road, Wilmington, Delaware 19805 and 2211 H.H. Dow Way, Midland, Michigan 48674.

- 89. On June 1, 2019, DowDuPont separated its agriculture business through the spinoff of Corteva.
- 90. Corteva was initially formed in February 2018. From that time until June 1, 2019, Corteva was a wholly owned subsidiary of DowDuPont.
- 91. On June 1, 2019, DowDuPont distributed to DowDuPont stockholders all issued and outstanding shares of Corteva common stock by way of a pro-rata dividend. Following that distribution, Corteva became the direct parent of E. I. Du Pont de Nemours & Co.
- 92. Corteva holds certain DowDuPont assets and liabilities, including DowDuPont's agriculture and nutritional businesses.
- 93. On June 1, 2019, DowDuPont, the surviving entity after the spin-off of Corteva and of another entity known as Dow, Inc., changed its name to DuPont de Nemours, Inc., to be known as DuPont ("New DuPont"). New DuPont retained assets in the specialty products business lines following the above-described spin-offs, as well as the balance of the financial assets and liabilities of E.I DuPont not assumed by Corteva.
- 94. Defendants E. I. Du Pont de Nemours and Company; The Chemours Company; The Chemours Company FC, LLC; Corteva, Inc.; and DuPont de Nemours, Inc. are collectively referred to as "DuPont" throughout this Complaint.
- 95. On information and belief, DuPont designed, manufactured, marketed, distributed, and sold fluorosurfactants containing PFOS, PFOA, and/or their chemical precursors for use in AFFF products.

96. On information and belief, 3M and Chemguard also designed, manufactured, marketed, distributed, and sold fluorosurfactants containing PFOS, PFOA, and/or their chemical precursors for use in AFFF products.

97. On information and belief, the Fluorosurfactant Defendants designed, manufactured, marketed, distributed, and sold fluorosurfactants containing PFOS, PFOA, and/or their chemical precursors for use in AFFF products that were stored, handled, used, used in training and testing equipment, otherwise discharged, and/or disposed in or around the Village of Johnson City, New York.

iii. The PFC Defendants

- 98. The term "**PFC Defendants**" refers collectively to 3M, AGC Chemicals Americas Inc., Archroma U.S., Inc., ChemDesign Products Inc., Chemicals, Inc., Clariant Corporation, Deepwater Chemicals, Inc., E. I. DuPont de Nemours and Company, The Chemours Company, The Chemours Company FC, LLC, Corteva, Inc., DuPont de Nemours Inc., and Nation Ford Chemical Company.
- 99. **Defendant AGC Chemicals Americas, Inc. ("AGC")** is a corporation organized and existing under the laws of Delaware, having its principal place of business at 55 East Uwchlan Avenue, Suite 201, Exton, PA 19341.
- 100. On information and belief, AGC Chemicals Americas, Inc. was formed in 2004 and is a subsidiary of AGC Inc., a foreign corporation organized under the laws of Japan, with its principal place of business in Tokyo, Japan.
- 101. AGC manufactures specialty chemicals. It offers glass, electronic displays, and chemical products, including resins, water and oil repellants, greenhouse films, silica additives, and various fluorointermediates.

102. On information and belief, AGC designed, manufactured, marketed, distributed, and sold PFCs containing PFOS, PFOA, and/or their chemical precursors for use in manufacturing the fluorosurfactants used in AFFF products.

103. Defendant Archroma U.S., Inc. ("Archroma") is a corporation organized and existing under the laws of Delaware, with its a principal place of business at 5435 77 Center Drive, Charlotte, North Carolina 28217.

104. On information and belief, Archroma was formed in 2013 when Clariant Corporation divested its textile chemicals, paper specialties, and emulsions business to SK Capital Partners.

105. On information and belief, Archroma designed, manufactured, marketed, distributed, and sold PFCs containing PFOS, PFOA, and/or their chemical precursors for use in manufacturing the fluorosurfactants used in AFFF products.

106. **Defendant Chemicals, Inc.** ("Chemicals, Inc.") is a corporation organized and existing under the laws of Texas, with its principal place of business located at 12321 Hatcherville, Baytown, TX 77520.

107. On information and belief, Chemicals, Inc. supplied PFCs containing PFOS, PFOA, and/or their chemical precursors for use in manufacturing the fluorosurfactants used in AFFF products.

108. **Defendant Clariant Corporation ("Clariant")** is a corporation organized and existing under the laws of New York, with its principal place of business at 4000 Monroe Road, Charlotte, North Carolina 28205.

DOC. NO. 1

109. On information and belief, Clariant is the successor in interest to the specialty chemicals business of Sandoz Chemical Corporation ("Sandoz"). On information and belief, Sandoz spun off its specialty chemicals business to form Clariant in 1995.

- 110. On information and belief, Clariant supplied PFCs containing PFOS, PFOA, and/or their chemical precursors for use in manufacturing the fluorosurfactants used in AFFF products.
- 111. **Defendant Nation Ford Chemical Co. ("Nation Ford")** is a corporation organized and existing under the laws of South Carolina, with its principal place of business located at 2300 Banks Street, Fort Mill, SC 29715.
- 112. On information and belief, Nation Ford supplied PFCs containing PFOS, PFOA, and/or their chemical precursors for use in manufacturing the fluorosurfactants used in AFFF products.
- 113. On information and belief, 3M, ChemDesign, Deepwater Chemicals, and DuPont also supplied PFCs containing PFOS, PFOA, and/or their chemical precursors for use in manufacturing the fluorosurfactants used in AFFF products.
- 114. On information and belief, the Fluorochemical Defendants supplied PFCs containing PFOS, PFOA, and/or their chemical precursors for use in manufacturing the fluorosurfactants used in AFFF products that were stored, handled, used, used in training and testing equipment, otherwise discharged, and/or disposed in or around the Village of Johnson City, New York.
- 115. Defendants represent all or substantially all of the market for AFFF/Component Products used in or around the Village of Johnson City, New York.

iv. The Doe Defendants 1-20

116. Doe Defendants 1-20 are unidentified entities or persons whose names are presently unknown and whose actions, activities, omissions (a) may have permitted, caused and/or

INDEX NO. EFCA2021001849 2:28 PM Filed 08/17/21 Page 19 of 51 RECEIVED NYSCEF: 07/23/2021

contributed to the contamination of Plaintiff's water sources or supply wells; or (b) may be

vicariously responsible for entities or persons who permitted, caused and/or contributed to the

contamination of Plaintiff's water sources or supply wells; or (c) may be successors in interest to

entities or persons who permitted, caused and/or permitted, contributed to the contamination of

Plaintiff's water sources or supply wells. After reasonable search and investigation to ascertain the

Doe Defendants actual names, the Doe Defendants' actual identities are unknown to Plaintiff as

they are not linked with any of the Defendants on any public source.

117. The Doe Defendants 1-20 either in their own capacity or through a party they are

liable for: (1) designed, manufactured, marketed, distributed, and/or sold AFFF products

containing PFOS, PFOA, and/or their chemical precursors, and/or designed, manufactured,

marketed, distributed, and/or sold the fluorosurfactants and/or PFCs contained in

AFFF/Component Products; or (2) used, handled, transported, stored, discharged, disposed of,

designed, manufactured, marketed, distributed, and/or sold PFOS, PFOA, and/or their chemical

precursors, or other non-AFFF products containing PFOS, PFOA, and/or their chemical

precursors; or (3) failed to timely perform necessary and reasonable response and remedial

measures to releases of PFOS, PFOA, and/or their chemical precursors, or other non-AFFF

products containing PFOS, PFOA, and/or their chemical precursors in to the environment in which

Plaintiff's water supplies and well exist.

118. All Defendants, at all times material herein, acted by and through their respective

agents, servants, officers and employees, actual or ostensible, who then and there were acting

within the course and scope of their actual or apparent agency, authority or duties. Defendants are

liable based on such activities, directly and vicariously.

18

INDEX NO. EFCA2021001849 28 PM Page 20 of 51 Filed 08/17/21 Page 20 of MYSCEF: 07/23/2021

FACTUAL ALLEGATIONS RELEVANT TO ALL CAUSES OF ACTION

Α. PFOA and PFOS and Their Risk to Public Health

PFAS are chemical compounds containing fluorine and carbon. These substances 119.

have been used for decades in the manufacture of, among other things, household and commercial

products that resist heat, stains, oil, and water. These substances are not naturally occurring and

must be manufactured.

120. The two most widely studied types of these substances are PFOA and PFOS.

121. PFOA and PFOS have unique properties that cause them to be: (i) mobile and

persistent, meaning that they readily spread into the environment where they break down very

slowly; (ii) bioaccumulative and biomagnifying, meaning that they tend to accumulate in

organisms and up the food chain; and (iii) toxic, meaning that they pose serious health risks to

humans and animals.

122. PFOA and PFOS easily dissolve in water, and thus they are mobile and easily

spread in the environment. PFOA and PFOS also readily contaminate soils and leach from the soil

into groundwater, where they can travel significant distances.

123. PFOA and PFOS are characterized by the presence of multiple carbon-fluorine

bonds, which are exceptionally strong and stable. As a result, PFOA and PFOS are thermally,

chemically, and biologically stable. They resist degradation due to light, water, and biological

processes.

124. Bioaccumulation occurs when an organism absorbs a substance at a rate faster than

the rate at which the substance is lost by metabolism and excretion. Biomagnification occurs when

the concentration of a substance in the tissues of organisms increases as the substance travels up

the food chain.

19

TILED: BROOME COUNTY CLERK 07/23/2021 12:28 PM INDEX NO. EFCA2021001849

VECUL DOC NO CASE 3:21-CV-00927-TJM-ML DOCUMENT 2 FILED 08/17/21 Page 21 of 51

RECEIVED NYSCEF: 07/23/2021

125. PFOA and PFOS bioaccumulate/biomagnify in numerous ways. First, they are relatively stable once ingested, so that they bioaccumulate in individual organisms for significant periods of time. Because of this stability, any newly ingested PFOA and PFOS will be added to any PFOA and PFOS already present. In humans, PFOA and PFOS remain in the body for years.

- 126. PFOA and PFOS biomagnify up the food chain. This occurs, for example, when humans eat fish that have ingested PFOA and/or PFOS.
- 127. The chemical structure of PFOA and PFOS makes them resistant to breakdown or environmental degradation. As a result, they are persistent when released into the environment.
 - 128. Exposure to PFAS is toxic and poses serious health risks to humans and animals.
- 129. PFAS are readily absorbed after consumption or inhalation and accumulate primarily in the bloodstream, kidney, and liver.

B. Defendants' Manufacture and Sale of AFFF/Component Products

- 130. AFFF is a type of water-based foam that was first developed in the 1960s to extinguish hydrocarbon fuel-based fires.
- 131. AFFF is a Class-B firefighting foam. It is mixed with water and used to extinguish fires that are difficult to fight, particularly those that involve petroleum or other flammable liquids.
- 132. AFFF is synthetically formed by combining fluorine-free hydrocarbon foaming agents with fluorosurfactants. When mixed with water, the resulting solution produces an aqueous film that spreads across the surface of hydrocarbon fuel. This film provides fire extinguishment and is the source of the designation aqueous film-forming foam.
- 133. Beginning in the 1960s, the AFFF Defendants designed, manufactured, marketed, distributed, and/or sold AFFF products that used fluorosurfactants containing either PFOS, PFOA, or the chemical precursors that degrade into PFOS and PFOA.

INDEX NO. EFCA2021001849 2:28 PM Filed 08/17/21 Page 22 of 51 RECEIVED NYSCEF: 07/23/2021

AFFF can be made without the fluorosurfactants that contain PFOA, PFOS, and/or 134.

their precursor chemicals. Fluorine-free firefighting foams, for instance, do not release PFOA,

PFOS, and/or their precursor chemicals into the environment.

AFFF that contains fluorosurfactants, however, is better at extinguishing 135.

hydrocarbon fuel-based fires due to their surface-tension lowering properties, essentially

smothering the fire and starving it of oxygen.

The fluorosurfactants used in 3M's AFFF products were manufactured by 3M's 136.

patented process of electrochemical fluorination ("ECF").

137. The fluorosurfactants used in other AFFF products sold by the AFFF Defendants

were manufactured by the Fluorosurfactant Defendants through the process of telomerization.

138. The PFCs the Fluorosurfactant Defendants needed to manufacture those

fluorosurfactants contained PFOS, PFOA, and/or their chemical precursors and were designed,

manufactured, marketed, distributed and/or sold by the PFC Defendants.

139. On information and belief, the PFC and Fluorosurfactant Defendants were aware

that the PFCs and fluorosurfactants they designed, manufactured, marketed, distributed, and/or

sold would be used in the AFFF products designed, manufactured, marketed, distributed, and/or

sold by the AFFF Defendants.

140. On information and belief, the PFC and Fluorosurfactant Defendants designed,

manufactured, marketed, distributed, and/or sold the PFC and/or fluorosurfactants contained in the

AFFF products discharged into the environment in and around the Village of Johnson City, New

York during fire protection, training, and response activities, resulting in widespread PFAS

contamination.

INDEX NO. EFCA2021001849 **2:28 PM**Filed 08/17/21 Page 23 of 51

RECEIVED NYSCEF: 07/23/2021

On information and belief, the AFFF Defendants designed, manufactured, marketed, distributed, and/or sold the AFFF products discharged into the environment in and around the Village of Johnson City, New York during fire protection, training, and response activities, resulting in widespread PFAS contamination.

C. Defendants' Knowledge of the Threats to Public Health and the Environment Posed by PFOS and PFOA

On information and belief, by at least the 1970s, 3M and DuPont knew or should 142. have known that PFOA and PFOS are mobile and persistent, bioaccumulative and biomagnifying, and toxic.

143. On information and belief, 3M and DuPont concealed from the public and government agencies their knowledge of the threats to public health and the environment posed by PFOA and PFOS.

144. Some or all of the Defendants understood how stable the fluorinated surfactants used in AFFF are when released into the environment from their first sale to a customer, yet they failed to warn their customers or provide reasonable instruction on how to manage wastes generated from their products.

i. 1940s and 1950s: Early Warnings About the Persistence of AFFF

In 1947, 3M started its fluorochemical program. Within four years, it began selling 145. its PFOA to DuPont. The persistence and contaminating nature of the fluorosurfactants contained in AFFF products were understood prior to their commercial application at 3M's Cottage Grove facility in Minnesota.

The inventor of 3M's ECF process was J.H. Simons. Simons' 1948 patent for the 146. ECF process reported that PFCs are "non-corrosive, and of little chemical reactivity," and "do not 2:28 PM Filed 08/17/21 Page 24 of 51 RECEIVED NYSCEF: 07/23/2021 INDEX NO. EFCA2021001849

react with any of the metals at ordinary temperatures and react only with the more chemically reactive metals such as sodium, at elevated temperatures."¹

Simons further reported that fluorosurfactants produced by the ECF process do not 147. react with other compounds or reagents due to the blanket of fluorine atoms surrounding the carbon skeleton of the molecule. 3M understood that the stability of the carbon-to-fluorine bonds prevented its fluorosurfactants from undergoing further chemical reactions or degrading under natural processes in the environment.²

The thermal stability of 3M's fluorosurfactants was also understood prior to 148. commercial production. Simons' patent application further discloses that the fluorosurfactants produced by the ECF process were thermally stable at temperatures up to 750° C (1382° F). Additional research by 3M expanded the understanding of the thermal stability of perfluorocarbon compounds.3

Nowhere in any Material Safety Data Sheet for any of Defendants' 149. AFFF/Component Products is information on the thermal stability of those products disclosed. Failure to disclose knowledge of the stability of the PFCs and fluorosurfactants used in AFFF products to customers is a failure to warn just how indestructible the AFFF's ingredients are when released to unprotected water sources and even treatment plants.

ii. 1960s: AFFF's Environmental Hazards Come into Focus

By at least the end of the 1960s, additional research and testing performed by 3M 150. and DuPont indicated that fluorosurfactants, including at least PFOA, because of their unique

chemical structure, were resistant to environmental degradation and would persist essentially unaltered if allowed to enter the environment.

One 3M employee wrote in 1964: "This chemical stability also extends itself to all 151. types of biological processes; there are no known biological organisms that are able to attack the carbon-fluorine bond in a fluorocarbon." Thus, 3M knew by the mid-1960s that its surfactants were immune to chemical and biological degradation in soils and groundwater.

3M also knew by 1964 that, when dissolved, fluorocarbon carboxylic acids and 152. fluorocarbon sulfonic acids dissociated to form highly stable perfluorocarboxylate and perfluorosulfonate ions. Later studies by 3M on the adsorption and mobility of FC-95 and FC-143 (the ammonium salt of PFOA) in soils indicated very high solubility and very high mobility in soils for both compounds.⁵

- iii. 1970s: Internal Studies Provide Evidence of Environmental and Health Risks
- 153. By 1950, 3M knew that the fluorosurfactants used in its AFFF product(s) would not degrade when released to the environment, but would remain intact and persist. Two decades later—and after the establishment of a robust market of AFFFs using fluorosurfactants—3M finally got around to looking at the environmental risks that fluorosurfactants posed.
- 154. An internal memo from 3M in 1971 states that "the thesis that there is 'no natural sink' for fluorocarbons obviously demands some attention."6 Hence, 3M understood, at the very

⁶ Memorandum from H.G. Bryce to R.M. Adams re: Ecological Aspects of Fluorocarbons, Sept. 13, 1971, available at https://www.ag.state.mn.us/Office/Cases/3M/docs/PTX/PTX1088.pdf.

TLED: BROOME COUNTY CLERK 07/23/2021 12:28 PM INDEX NO. EFCA2021001849

VECEF DOC NO CASE 3:21-CV-00927-TJM-ML DOCUMENT 2 FIRM 08/17/21 Page 26 of 51

RECEIVED NYSCEF: 07/23/2021

least, that the fluorosurfactant used in its AFFF products would, in essence, never degrade once it was released into the environment.

155. By the mid-1970s, 3M and Ansul (and possibly other Defendants) had an intimate understanding of the persistent nature of PFCs. A 1976 study, for example, observed no

biodegradation of FC-95, the potassium salt of PFOS; a result 3M characterized as "unsurprising"

in light of the fact that "[b]iodegradation of FC 95 is improbable because it is completely

fluorinated."7

156. In 1977, Ansul authored a report titled "Environmentally Improved AFFF," which

acknowledged that releasing AFFF into the environment could pose potential negative impacts to

groundwater quality.⁸ Ansul wrote: "The purpose of this work is to explore the development of

experimental AFFF formulations that would exhibit reduced impact on the environment while

retaining certain fire suppression characteristic . . . improvements [to AFFF formulations] are

desired in the environmental area, i.e., development of compositions that have a reduced impact

on the environment without loss of fire suppression effectiveness." Thus, Ansul knew by the mid-

1970s that the environmental impact of AFFF needed to be reduced, yet there is no evidence that

Ansul (or any other Defendant) ever pursued initiatives to do so.

157. A 1978 3M biodegradation study likewise reported that an "extensive study

strongly suggest[ed]" one of its PFCs is "likely to persist in the environment for extended period

unaltered by metabolic attack." A year later, a 3M study reported that one of its fluorosurfactants

RECEIVED NYSCEF: 07/23/2021

"was found to be completely resistant to biological test conditions," and that it appeared waterways were the fluorosurfactant's "environmental sink." ¹⁰

158. In 1979, 3M also completed a comprehensive biodegradation and toxicity study covering investigations between 1975 and 1978.¹¹ More than a decade after 3M began selling AFFF containing fluorosurfactants, it wrote: "there has been a general lack of knowledge relative to the environmental impact of these chemicals." The report ominously asked, "If these materials are not biodegradable, what is their fate in the environment?"

- 159. During the 1970s, 3M also learned that the fluorosurfactants used in AFFF accumulated in the human body and were "even more toxic" than previously believed.
- 160. In 1975, 3M learned that PFAS was present in the blood of the general population.¹² Since PFOA and PFOS are not naturally occurring, this finding should have alerted 3M to the possibility that their products were a source of this PFOS. The finding also should have alerted 3M to the possibility that PFOS might be mobile, persistent, bioaccumulative, and biomagnifying, as those characteristics could explain how PFOS from 3M's products ended up in human blood.
- 161. In 1976, 3M found PFAS in the blood of its workers at levels "up to 1000 times 'normal' amounts of organically bound fluorine in their blood."¹³ This finding should have alerted 3M to the same issues raised by the prior year's findings.

162. Studies by 3M in 1978 showed that PFOA reduced the survival rate of fathead minnow fish eggs,¹⁴ that PFOS was toxic to monkeys,¹⁵ and that PFOS and PFOA were toxic to rats.¹⁶ In the study involving monkeys and PFOS, all of the monkeys died within days of ingesting food contaminated with PFOS.

163. In 1979, 3M and DuPont discussed 3M's discovery of PFOA in the blood of its workers and came to the same conclusion that there was "no reason" to notify the EPA of the finding.¹⁷

iv. 1980s and 1990s: Evidence of AFFF's Health Risks Continues to Mount

164. By at least the end of the 1980s, additional research and testing performed by Defendants, including at least 3M and DuPont, indicated that elevated incidence of certain cancers and other adverse health effects, including elevated liver enzymes and birth defects, had been observed among workers exposed to such materials, including, at least, PFOA. However, such data was not published, provided to governmental entities as required by law, or otherwise publicly disclosed at the time.

165. In 1981, DuPont tested for and found PFOA in the blood of female plant workers at its facility in Parkersburg, West Virginia. DuPont observed and documented pregnancy outcomes in exposed workers, finding two of seven children born to female plant workers between

1979 and 1981 had birth defects—one an "unconfirmed" eye and tear duct defect, and one a nostril and eye defect. 18

166. In 1983, 3M researchers concluded that concerns about PFAS "give rise to concern for environmental safety," including "legitimate questions about the persistence, accumulation potential, and ecotoxicity of fluorochemicals in the environment." That same year, 3M completed a study finding that PFOS caused the growth of cancerous tumors in rats. ²⁰ This finding was later shared with DuPont and led them to consider whether "they may be obliged under their policy to call FC-143 a carcinogen in animals." ²¹

167. In 1984, 3M documented a trend of increasing levels of PFOS in the bodies of 3M workers, leading one of the company's medical officers to warn in an internal memo: "we must view this present trend with serious concern. It is certainly possible that . . . exposure opportunities are providing a potential uptake of fluorochemicals that exceeds excretion capabilities of the body."²²

168. A 1997 material safety data sheet ("MSDS") for a non-AFFF product made by 3M listed its only ingredients as water, PFOA, and other perfluoroalkyl substances and warned that the product includes "a chemical which can cause cancer." The MSDS cited "1983 and 1993 studies conducted jointly by 3M and DuPont" as support for this statement. On information and belief, the MSDS for 3M's AFFF products did not provide similar warnings or information.

v. <u>Defendants Hid What They Knew from the Government and the Public.</u>

169. Federal law requires chemical manufacturers and distributors to immediately notify

the EPA if they have information that "reasonably supports the conclusion that such substance or

mixture presents a substantial risk of injury to health or the environment." Toxic Substances

Control Act ("TSCA") § 8(e), 15 U.S.C. § 2607(e)

170. In April 2006, 3M agreed to pay EPA a penalty of more than \$1.5 million after

being cited for 244 violations of the TSCA, which included violations for failing to disclose studies

regarding PFOS, PFOA, and other PFCs dating back decades.

171. Likewise, in December 2005, the EPA announced it was imposing the "Largest

Environmental Administrative Penalty in Agency History" against DuPont based on evidence that

it violated the TSCA by concealing the environmental and health effects of PFOA.

172. On information and belief, Defendants knew or should have known that AFFF

containing PFOA or PFOS would very likely injure and/or threaten public health and the

environment, even when used as intended or directed.

173. Defendants failed to warn of these risks to the environment and public health,

including the impact of their AFFF/Component Products on the quality of unprotected water

sources.

174. Defendants were all sophisticated and knowledgeable in the art and science of

designing, formulating, and manufacturing AFFF/Component Products. They understood far more

about the properties of their AFFF/Component Products—including the potential hazards they

posed to human health and the environment—than any of their customers. Still, Defendants

declined to use their sophistication and knowledge to design safer products.

29

INDEX NO. EFCA2021001849

Filed 08/17/21 Page 31 of 51 RECEIVED NYSCEF: 07/23/2021

D. The Impact of PFOS and PFOA on the Environment and Human Health Is **Finally Revealed**

175. As discussed above, neither 3M, DuPont, nor, on information and belief, any other

Defendant complied with their obligations to notify EPA about the "substantial risk of injury to

health or the environment" posed by their AFFF/Component Products. See TSCA § 8(e).

176. Despite decades of research, 3M first shared its concerns with EPA in the late

1990s. In a May 1998 report submitted to EPA, "3M chose to report simply that PFOS had been

found in the blood of animals, which is true but omits the most significant information," according

to a former 3M employee.²³

177. On information and belief, in the year 2000, 3M began to phase out its production

of products that contained PFOS and PFOA in response to pressure from the EPA.

178. Once the truth about PFOS and PFOA was revealed, researchers began to study the

environmental and health effects associated with them, including a "C8 Science Panel" formed out

of a class action settlement arising from contamination from DuPont's Washington Works located

in Wood County, West Virginia.

The C8 panel consisted of three epidemiologists specifically tasked with

determining whether there was a probable link between PFOA exposure and human diseases. In

2012, the panel found probable links between PFOA and kidney cancer, testicular cancer,

ulcerative colitis, thyroid disease, pregnancy-induced hypertension (including preeclampsia), and

hypercholesterolemia.

180. Human health effects associated with PFOS exposure include immune system

effects, changes in liver enzymes and thyroid hormones, low birth weight, high uric acid, and high

²³ Letter from R. Purdy, Mar. 28, 1999, available at

https://www.ag.state.mn.us/Office/Cases/3M/docs/PTX/PTX1001.pdf.

INDEX NO. EFCA2021001849 : 28 PM Page 32 iled 08/17/21 Page 32

cholesterol. In laboratory testing on animals, PFOA and PFOS have caused the growth of tumors,

changed hormone levels, and affected the function of the liver, thyroid, pancreas, and immune

system.

181. The injuries caused by PFAS can arise months or years after exposure.

182. Even after the C8 Science Panel publicly announced that human exposure to 50

parts per trillion, or more, of PFOA in drinking water for one year or longer had "probable links"

with certain human diseases, including kidney cancer, testicular cancer, ulcerative colitis, thyroid

disease, preeclampsia, and medically-diagnosed high cholesterol, Defendants repeatedly assured

and represented to governmental entities, their customers, and the public (and continue to do so)

that the presence of PFOA in human blood at the levels found within the United States presents no

risk of harm and is of no legal, toxicological, or medical significance of any kind.

183. Furthermore, Defendants have represented to and assured such governmental

entities, their customers, and the public (and continue to do so) that the work of the independent

C8 Science Panel was inadequate to satisfy the standards of Defendants to prove such adverse

effects upon and/or any risk to humans with respect to PFOA in human blood.

At all relevant times, Defendants, through their acts and/or omissions, controlled, 184.

minimized, trivialized, manipulated, and/or otherwise influenced the information that was

published in peer-review journals, released by any governmental entity, and/or otherwise made

available to the public relating to PFAS in human blood and any alleged adverse impacts and/or

risks associated therewith, effectively preventing the public from discovering the existence and

extent of any injuries/harm as alleged herein.

TILED: BROOME COUNTY CLERK 07/23/2021 12:28 PM INDEX NO. EFCA2021001849

VSCEF DOC NO. Case 3:21-cv-00927-TJM-ML Document 2 Filed 08/17/21 Page 33 of 51

RECEIVED NYSCEF: 07/23/2021

185. On May 2, 2012, the EPA published its Third Unregulated Contaminant Monitoring Rule ("UCMR3"), requiring public water systems nationwide to monitor for thirty contaminants of concern between 2013 and 2015, including PFOS and PFOA.²⁴

186. In the May 2015 "Madrid Statement on Poly- and Perfluoroalkyl Substances (PFAS's)," scientists and other professionals from a variety of disciplines, concerned about the production and release into the environment of PFOA, called for greater regulation, restrictions, limits on the manufacture and handling of any PFOA containing product, and to develop safe non-fluorinated alternatives to these products to avoid long-term harm to human health and the environment.²⁵

187. On May 25, 2016, the EPA released a lifetime health advisory (HAs) and health effects support documents for PFOS and PFOA. See Fed. Register, Vol. 81, No. 101, May 25, 2016. The EPA developed the HAs to assist governmental officials in protecting public health when PFOS and PFOA are present in drinking water. The EPA HAs identified the concentration of PFOS and PFOA in drinking water at or below which adverse health effects are not anticipated to occur over a lifetime of exposure at 0.07 ppb or 70 ppt. The HAs were based on peer-reviewed studies of the effects of PFOS and PFOA on laboratory animals (rats and mice) and were also informed by epidemiological studies of human populations exposed to PFOS. These studies indicate that exposure to PFOS and PFOA over these levels may result in adverse health effects, including:

a. Developmental effects to fetuses during pregnancy or to breastfed infants (e.g., low birth weight, accelerated puberty, skeletal variations);

- b. Cancer (testicular and kidney);
- c. Liver effects (tissue damage);
- d. Immune effects (e.g., antibody production and immunity);
- e. Thyroid disease and other effects (e.g., cholesterol changes).
- 188. In addition, PFOS and PFOA are hazardous materials because they pose a "present or potential threat to human health."²⁷
- 189. In 2016, the National Toxicology Program of the United States Department of Health and Human Services ("NTP") and the International Agency for Research on Cancer ("IARC") both released extensive analyses of the expanding body of research regarding the adverse effects of PFCs. The NTP concluded that both PFOA and PFOS are "presumed to be an immune hazard to humans" based on a "consistent pattern of findings" of adverse immune effects in human (epidemiology) studies and "high confidence" that PFOA and PFOS exposure was associated with suppression of immune responses in animal (toxicology) studies.²⁸
- 190. IARC similarly concluded that there is "evidence" of "the carcinogenicity of . . . PFOA" in humans and in experimental animals, meaning that "[a] positive association has been observed between exposure to the agent and cancer for which a causal interpretation is . . . credible."²⁹

²⁷ *Id.*; see also National Ass'n for Surface Finishing v. EPA, 795 F.3d 1, 3, 6 (D.C. Cir. 2015) (referring to PFOS as a "toxic compound" and a "hazardous chemical.").

³⁴ Press Release, EPA Announces Proposed Decision to Regulate PFOA and PFOS in Drinking

INDEX NO. EFCA2021001849 Filed 08/17/21 Page 36.0f 51 RECEIVED NYSCEF: 07/23/2021

whether to move forward with the process of establishing a national primary drinking water regulation for PFOA and PFOS.

AFFF Containing PFOS and PFOA Is Fungible and Commingled in the Ε. Groundwater

195. AFFF containing PFOS and/or PFOA, once it has been released to the environment,

lacks characteristics that would enable identification of the company that manufactured that

particular batch of AFFF or chemical feedstock.

196. A subsurface plume, even if it comes from a single location, such as a retention

pond or fire training area, originates from mixed batches of AFFF and chemical feedstock coming

from different manufacturers.

197. Because precise identification of the specific manufacturer of any given

AFFF/Component Product that was a source of the PFAS found in and around the Village of

Johnson City, New York is nearly impossible, given certain exceptions, Plaintiff must pursue all

Defendants, jointly and severally.

198. Defendants are also jointly and severally liable because they conspired to conceal

the true toxic nature of PFOS and PFOA, to profit from the use of AFFF/Component Products

containing PFOS and PFOA, at Plaintiff's expense, and to attempt to avoid liability.

MARKET SHARE LIABILITY, ALTERNATIVE LIABILITY, CONCERT OF ACTION, AND ENTERPRISE LIABILITY

Defendants in this action are manufacturers that control a substantial share of the 199.

market for AFFF/Component Products containing PFOS, PFOA, and/or their chemical precursors

in the United States and are jointly responsible for the contamination of the groundwater in and

around the Village of Johnson City, New York. Market share liability attaches to all Defendants

Water, Feb. 20, 2020, available at https://www.epa.gov/newsreleases/epa-announces-proposed-decisionregulate-pfoa-and-pfos-drinking-water.

35

and the liability of each should be assigned according to its percentage of the market for AFFF/Component Products at issue in this Complaint.

200. Because PFAS is fungible, it is impossible to identify the exact Defendant who manufactured any given AFFF/Component Product containing PFOS, PFOA, and/or their chemical precursors found free in the air, soil or groundwater, and each of these Defendants participated in a territory-wide and U.S. national market for AFFF/Component Products during the relevant time.

- 201. Concert of action liability attaches to all Defendants, each of which participated in a common plan to commit the torts alleged herein and each of which acted tortiously in pursuance of the common plan to knowingly manufacture and sell inherently dangerous AFFF/Component Products containing PFOS, PFOA, and/or their chemical precursors.
- 202. Enterprise liability attaches to all the named Defendants for casting defective products into the stream of commerce.

CAUSES OF ACTION

COUNT I: DEFECTIVE DESIGN

- 203. Plaintiff adopts, realleges, and incorporates the allegations in the preceding paragraphs and further alleges the following:
- 204. As manufacturers of AFFF/Component Products containing PFOS, PFOA, and/or their chemical precursors, Defendants owed a duty to all persons whom its products might foreseeably harm, including Plaintiff, not to market any product which is unreasonably dangerous in design for its reasonably anticipated use.
- Defendants' AFFF/Component Products were unreasonably dangerous for their 205. reasonably anticipated uses for the following reasons:

INDEX NO. EFCA2021001849 Filed 08/17/21 Page 38 of 51 RECEIVED NYSCEF: 07/23/2021

a. PFAS causes extensive groundwater contamination, even when used in its foreseeable and intended manner;

b. Even at extremely low levels, PFAS render drinking water unfit for consumption;

c. PFAS poses significant threats to public health; and

d. PFAS create real and potential environmental damage.

Defendants knew of these risks and failed to use reasonable care in the design of 206.

their AFFF/Component Products.

207. AFFF containing PFOS, PFOA, and/or their chemical precursors poses a greater

danger to the environment and to human health than would be expected by ordinary persons such

as Plaintiff and the general public.

At all times, Defendants were capable of making AFFF/Component Products that 208.

did not contain PFOS, PFOA, and/or their chemical precursors. Thus, reasonable alternative

designs existed which were capable of preventing Plaintiff's injuries.

The risks posed by AFFF containing PFOS, PFOA, and/or their chemical 209.

precursors far outweigh the products' utility as a flame-control product.

210. The likelihood that Defendants' AFFF/Component Products would be spilled,

discharged, disposed of, or released into the environment and contaminate Plaintiff's drinking

water supplies outweighed any burden on Defendants to adopt an alternative design, and

outweighed the adverse effect, if any, of such alternative design on the utility of the product.

211. As a direct and proximate result of Defendants' unreasonably dangerous design,

manufacture, and sale of AFFF/Component Products containing PFOS, PFOA, and/or their

chemical precursors, Plaintiff's wells have become contaminated with PFAS, causing Plaintiff to

incur costs and damages.

Defendants knew that it was substantially certain that their acts and omissions 212. described above would contaminate the groundwater, leading to the contamination of drinking water supplies, including those of Plaintiff. Defendants committed each of the above-described acts and omissions knowingly, willfully, and/or with fraud, oppression, or malice, and with conscious and/or reckless disregard for Plaintiff's customers' health and safety, and/or Plaintiff's property rights.

COUNT 2: FAILURE TO WARN

- 213. Plaintiff adopts, realleges, and incorporates the allegations in the preceding paragraphs and further alleges the following:
- As manufacturers of AFFF/Component Products containing PFOS, PFOA, and/or their chemical precursors, Defendants had a duty to provide adequate warnings of the risks of these products to all persons whom its product might foreseeably harm, including Plaintiff and the public.
- 215. Defendants' AFFF/Component Products were unreasonably dangerous for their reasonably anticipated uses for the following reasons:
 - a. PFAS cause extensive groundwater contamination, even when used in their foreseeable and intended manner;
 - b. Even at extremely low levels, PFAS render drinking water unfit for consumption;
 - c. PFAS pose significant threats to public health; and
 - d. PFAS create real and potential environmental damage.
- Defendants knew of the health and environmental risks associated with their 216. AFFF/Component Products, and failed to provide a warning that would lead an ordinary reasonable user or handler of a product to contemplate the dangers associated with their products or an instruction that would have avoided Plaintiff's injuries.

ILED: BROOME COUNTY CLERK 07/23/2021 12:28 PM INDEX NO. EFCA2021001849

COUNTY CLERK 07/23/2021 12:28 PM INDEX NO. EFCA2021001849

Page 40 of 51

RECEIVED NYSCEF: 07/23/2021

217. Despite Defendants' knowledge of the environmental and human health hazards

associated with the use and/or disposal of their AFFF/Component Products in the vicinity of drinking

water supplies, including PFAS contamination of public drinking supplies and private wells,

Defendants failed to issue any warnings, instructions, recalls, or advice regarding their

AFFF/Component Products to Plaintiff, governmental agencies or the public.

218. As a direct and proximate result of Defendants' failure to warn, Plaintiff's wells have

become contaminated with PFAS, causing Plaintiff to incur costs and damages.

219. Defendants knew that it was substantially certain that their acts and omissions

described above would contaminate the groundwater, leading to the contamination of drinking

water supplies, including those of Plaintiff. Defendants committed each of the above-described

acts and omissions knowingly, willfully, and/or with fraud, oppression, or malice, and with

conscious and/or reckless disregard for Plaintiff's customers' health and safety, and/or Plaintiff's

property rights.

<u>COUNT 3:</u> NEGLIGENCE

220. Plaintiff adopts, realleges, and incorporates the allegations in the preceding

paragraphs and further alleges the following:

221. As manufacturers of AFFF/Component Products containing PFOS, PFOA, and/or

their chemical precursors, Defendants owed a duty to Plaintiff and to all persons whom its products

might foreseeably harm and to exercise due care in the formulation, manufacture, sale, labeling,

warning, and use of PFAS-containing AFFF.

222. Defendants owed a duty to Plaintiff to act reasonably and not place inherently

dangerous AFFF/Component Products into the marketplace when its release into the air, soil, and

water was imminent and certain.

TILED: BROOME COUNTY CLERK 07/23/2021 12:28 PM INDEX NO. EFCA2021001849

VSCEF DOC NO CASE 3:21-CV-00927-TJM-ML DOCUMENT 2 FILED 08/17/21 Page 41 of 51

RECEIVED NYSCEF: 07/23/2021

223. Defendants knew or should have known that PFAS were leaching from AFFF used for fire protection, training, and response activities.

- 224. Defendants knew or should have known that PFAS are highly soluble in water, highly mobile, extremely persistent in the environment, and high likely to contaminate water supplies if released into the environment.
- 225. Defendants knew or should have known that the manner in which they were designing, manufacturing, marketing, distributing, and selling their AFFF/Component Products would result in the contamination of groundwater, leading to the contamination of drinking water supplies, including those of Plaintiff.
- 226. Despite the fact that Defendants knew or should have known that PFAS are toxic, can contaminate water resources and are carcinogenic, Defendants negligently:
 - a. designed, manufactured, formulated, handled, labeled, instructed, controlled, marketed, promoted, and/or sold AFFF/Component Products containing PFOS, PFOA, and/or their chemical precursors;
 - b. issued deficient instructions on how their AFFF/Component Products should be used and disposed of, thereby permitting PFAS to contaminate the groundwater in and around the Village of Johnson City, New York;
 - failed to recall and/or warn the users of their AFFF/Component Products of the dangers of groundwater contamination as a result of standard use and disposal of their products;
 - d. failed and refused to issue the appropriate warning and/or recalls to the users of their AFFF/Component Products; and
 - e. failing to take reasonable, adequate, and sufficient steps or actions to eliminate, correct, or remedy any contamination after it occurred.
- 227. The magnitude of the burden on the Defendants to guard against this foreseeable harm to Plaintiff was minimal, as the practical consequences of placing this burden on the Defendants amounted to a burden to provide adequate instructions, proper labeling, and sufficient warnings about their AFFF/Component Products.

Filed 08/17/21 Page 42 of 51 RECEIVED NYSCEF: 07/23/2021

As manufacturers, Defendants were in the best position to provide adequate instructions, proper labeling, and sufficient warnings about their AFFF/Component Products, and to take steps to eliminate, correct, or remedy any contamination they caused.

As a direct and proximate result of Defendants' negligence, Plaintiff's wells have 229. been contaminated with PFAS, causing Plaintiff to incur costs and damages.

230. Defendants knew that it was substantially certain that their acts and omissions described above would contaminate the groundwater, leading to the contamination of drinking water supplies, including those of Plaintiff. Defendants committed each of the above-described acts and omissions knowingly, willfully, and/or with fraud, oppression, or malice, and with conscious and/or reckless disregard for Plaintiff's customers' health and safety, and/or Plaintiff's property rights.

- 231. Plaintiff adopts, realleges, and incorporates the allegations in the preceding paragraphs and further alleges the following:
- 232. Plaintiff is the owner, operator, and actual possessor of real property and improvements used for collecting drinking water.
- 233. **Defendants** designed, manufactured, distributed, marketed, sold AFFF/Component Products with the actual knowledge and/or substantial certainty that AFFF containing PFOS, PFOA, and/or their chemical precursors would, through normal use, release PFAS that would migrate into groundwater, causing contamination.
- Defendants negligently, recklessly, and/or intentionally designed, manufactured, 234. distributed, marketed, and sold AFFF/Component Products in a manner that caused PFAS to contaminate Plaintiff's property.

INDEX NO. EFCA2021001849 Filed 08/17/21 Page 43 of 51 RECEIVED NYSCEF: 07/23/2021

As a direct and proximate result of Defendants' trespass, Plaintiff has suffered and 235. continues to suffer property damage requiring investigation, remediation, and monitoring costs.

Defendants knew that it was substantially certain that their acts and omissions 236.

described above would threaten public health and cause extensive contamination of property,

including groundwater collected for drinking. Defendants committed each of the above-described

acts and omissions knowingly, willfully, and/or with fraud, oppression, or malice, and with

conscious and/or reckless disregard for the health and safety of others, and for Plaintiff's property

rights.

ACTUAL FRAUDULENT TRANSFER (DuPont and Chemours Co.)

Plaintiff adopts, realleges, and incorporates the allegations in the preceding 237.

paragraphs and further alleges the following:

238. By means of the Spinoff described above, Chemours Co. and DuPont (the

"Fraudulent Transfer Defendants") caused Chemours Co. to transfer valuable assets to DuPont,

including but not limited to the \$3.9 billion dividend (the "Transfers"), while simultaneously

assuming significant liabilities (the "Assumed Liabilities").

239. The Transfers and Assumed Liabilities were made for the benefit of DuPont.

240. At the time that the Transfers were made and the Liabilities were assumed, and

until the Spinoff was complete, DuPont was in a position to, and in fact did, control and dominate

Chemours Co.

241. The Fraudulent Transfer Defendants made the Transfers and incurred the Assumed

Liabilities with the actual intent to hinder, delay, and defraud the creditors or future creditors of

Chemours Co.

ILED: BROOME COUNTY CLERK 07/23/2021 12:28 PM INDEX NO. EFCA2021001849

COUNTY CLERK 07/23/2021 12:28 PM INDEX NO. EFCA2021001849

Page 44 of 51

RECEIVED NYSCEF: 07/23/2021

242. Plaintiff has been harmed as a result of the conduct of the Fraudulent Transfer Defendants.

243. Plaintiff is entitled to avoid the Transfers and to recover property or value transferred to DuPont.

COUNT 6:CONSTRUCTIVE FRAUDULENT TRANSFER (DuPont and Chemours Co.)

- 244. Plaintiff adopts, realleges, and incorporates the allegations in the preceding paragraphs and further alleges the following:
- 245. Chemours Co. did not receive reasonably equivalent value from DuPont in exchange for the Transfers and Assumed Liabilities.
- 246. Each of the Transfers and the assumption of the Assumed Liabilities by Chemours Co. was made to or for the benefit of DuPont.
- 247. At the time that the Transfers were made and the Assumed Liabilities were assumed, and until the Spinoff was complete, DuPont was in a position to, and in fact did, control and dominate Chemours Co.
- 248. The Fraudulent Transfer Defendants made the Transfers and assumed the Assumed Liabilities when Chemours Co. was engaged or about to be engaged in a business for which its remaining assets were unreasonably small in relation to its business.
- 249. Chemours Co. was insolvent or in contemplation of insolvency at the time of the Transfers, or became insolvent as a result of the Transfers and its assumption of the Assumed Liabilities.
- 250. At the time that the Transfers were made and Chemours Co. assumed the Assumed Liabilities, the Fraudulent Transfer Defendants intended to incur, or believed or reasonably should have believed, that Chemours Co. would incur debts beyond its ability to pay as they became due.

251. Plaintiff has been harmed as a result of the Transfers.

252. Plaintiff is entitled to avoid the Transfers and to recover property or value

transferred to DuPont.

COUNT 7:

MARKET SHARE LIABILITY, ALTERNATIVE LIABILITY, CONCERT OF ACTION, ENTERPRISE LIABILITY

253. Plaintiff adopts, realleges, and incorporates the allegations in the preceding

paragraphs and further alleges the following

254. Defendants in this action are manufacturers that control a substantial share of the

market for AFFF/Component Products in the United States and are jointly responsible for the

contamination of Plaintiff's and the affected areas' groundwater supply and for causing the

damages and injuries complained of in this Complaint.

255. Market share liability attaches to all Defendants and the liability of each should be

assigned according to its percentage of the market for AFFF/Component Products at issue in this

Complaint.

256. Because PFAS are fungible, it is impossible to identify the exact Defendant who

manufactured any given AFFF/Component Product that contained the PFAS found free in the

groundwater, and, each of these Defendants participated in a state-wide and national market for

AFFF/Component Products during the relevant time.

257. Concert of action liability attaches to all Defendants, each of which participated in

a common plan to commit the torts alleged herein and each of which acted tortuously in pursuance

of the common plan to knowingly manufacture and sell inherently dangerous AFFF containing

PFAS.

258. Enterprise liability attaches to all of the named Defendants for casting defective

products into the stream of commerce.

INDEX NO. EFCA2021001849 Filed 08/17/21 Page 46 of 51 RECEIVED NYSCEF: 07/23/2021

COUNT 8: PUNITIVE DAMAGES

259. Plaintiff adopts, realleges, and incorporates the allegations in the preceding

paragraphs and further alleges the following:

Defendants engaged in willful, wanton, malicious, and or/reckless conduct that 260.

caused the foregoing damage to Plaintiff and its customers, disregarding their protected rights.

261. Defendants' willful, wanton, malicious, and/or reckless conduct includes but is not

limited to Defendants' failure to take all reasonable measures to ensure PFAS would not be

released into the environment and inevitably contaminate Plaintiffs' potable water supply wells.

262. Defendants have caused great harm to Plaintiff, acting with implied malice and an

outrageously conscious disregard for Plaintiff's rights and public safety, such that the imposition

of punitive damages is warranted.

PUBLIC NUISANCE

263. Plaintiff adopts, realleges, and incorporates the allegations in the preceding

paragraphs and further alleges the following:

As manufacturers of AFFF/Component Products containing PFAS, including but 264.

not limited to PFOS, PFOA, and/or their chemical precursors, Defendants owed a duty to Plaintiff

and to all persons whom its products might foreseeably harm and to exercise due care in the

formulation, manufacture, sale, marketing, labeling, advertising, warning, and use of PFAS-

containing AFFF.

Defendants owed a duty to Plaintiff to act reasonably and not place inherently 265.

dangerous AFFF/Component Products into the marketplace when its release into the air, soil, and

water was imminent and certain.

RECEIVED NYSCEF: 07/23/2021

266. Defendants knew or should have known that PFAS from AFFF used for fire protection, training, and response activities would enter into the environment, including groundwater and groundwater sources located at, beneath or nearby the place it was so used.

- 267. Defendants knew or should have known that PFAS are highly soluble in water, highly mobile, extremely persistent in the environment, and high likely to contaminate water supplies if released into the environment.
- 268. Defendants knew or should have known that the manner in which they were designing, manufacturing, marketing, distributing, and selling their AFFF/Component Products would result in injury and damage, including PFAS contamination of groundwater and drinking and potable water supply wells.
- 269. Despite the fact that Defendants knew or should have known that PFAS are toxic, can contaminate water resources and are carcinogenic, Defendants negligently:
 - a. designed, manufactured, formulated, handled, labeled, instructed, controlled, marketed, promoted, advertised, and/or sold AFFF/Component Products containing PFAS, including but not limited to PFOS, PFOA, and/or their chemical precursors;
 - issued deficient instructions and precautions on how their AFFF/Component Products should be used and disposed of, thereby permitting PFAS to contaminate Plaintiff's water systems in New York;
 - failed to recall and/or warn the possessors and users of their AFFF/Component Products of the dangers of groundwater contamination as a result of standard use and disposal of their products;
 - d. failed and refused to issue the appropriate warning and/or recalls to the possessors and users of their AFFF/Component Products;
 - e. failing to take reasonable, adequate, and sufficient steps or actions to eliminate, correct, or remedy any contamination after it occurred; and
 - f. otherwise being negligent, careless, or reckless in their respective design, manufacture, formulation, handling, labeling, warning, instructions marketing, promotion, advertising and/or sale of AFFF/Component Products containing PFAS, including but not limited to PFOS, PFOA, and/or their chemical precursors.

INDEX NO. EFCA2021001849 Filed 08/17/21 Page 48 of 51 RECEIVED NYSCEF: 07/23/2021

As manufacturers, Defendants were in the best position to provide a safe and

suitable product with adequate instructions, proper labeling, and sufficient warnings about their

AFFF/Component Products, and to take steps to eliminate, correct, or remedy any contamination

they caused.

271. Defendants knew that it was substantially certain that their acts and omissions

described above would inevitably result in the contamination of the Plaintiff's water systems in

New York.

272. As a direct result of Defendants' acts and omissions and the resulting

contamination, Plaintiff has incurred the significant expenses and costs described above.

273. Defendants committed each of the above-described acts and omissions knowingly,

willfully, and/or with fraud, oppression, or malice, and with conscious and/or reckless disregard

for Plaintiff's health and safety, and/or property rights.

PRIVATE NUISANCE

274. Plaintiff adopts, realleges, and incorporates the allegations in the preceding

paragraphs and further alleges the following:

275. Defendants' intentional, negligent, and/or reckless conduct, as alleged herein, has

resulted in contamination of Plaintiff's water systems in Vermont with PFAS, human carcinogens

that cause adverse human health effects.

276. Defendants' manufacture, distribution, sale, supply, and marketing of

AFFF/Component Products containing PFAS, including but not limited to PFOS, PFOA, and/or their

chemical precursors, was unreasonable because Defendants had knowledge of the unique and

dangerous chemical properties of PFAS and knew that contamination of groundwater supply wells

INDEX NO. EFCA2021001849 Filed 08/17/21 Page 49 of 51 RECEIVED NYSCEF: 07/23/2021

was substantially certain to occur, but failed to provide adequate warnings of, or take any other

precautionary measures to mitigate, those hazards.

277. The contamination caused, contributed to, and/or maintained by Defendants

substantially and unreasonably interfered and continues to interfere with Plaintiff's use and enjoyment

of its property.

278. Each Defendant has caused, contributed to, and/or maintained such nuisance, and is a

substantial contributor to such nuisance.

279. As a direct and proximate result of Defendants' acts and omissions as alleged herein,

Plaintiff has suffered, is suffering, and will continue to suffer substantial damages related to PFAS

contamination of the Impacted Systems, including but not limited to devaluation, capital costs, legal

costs, and sampling costs.

280. Defendants knew it was substantially certain that their acts and omissions described

above would cause injury and damage, including PFAS contamination of Plaintiff's groundwater

supplies. Defendants committed each of the above-described acts and omissions knowingly, willfully,

and with oppression, fraud, and/or malice. Such conduct was performed to promote sales of AFFF,

in conscious disregard to the probable dangerous consequences of that conduct and its reasonably

foreseeable impacts on groundwater resources, public health and welfare. Therefore, Plaintiff requests

an award of punitive damages in an amount sufficient to punish these Defendants and that fairly

reflects the aggravating circumstances alleged herein.

281. Defendants are jointly and severally liable for all such damages, and Plaintiff is

entitled to recover all such damages and other relief as set forth below.

INDEX NO. EFCA2021001849 Filed 08/17/21 Page 50 of 51 RECEIVED NYSCEF: 07/23/2021

PRAYER FOR RELIEF

WHEREFORE, Plaintiff, the Village of Johnson City, demands judgment against Defendants, and each of them, jointly and severally, and requests the following relief from the Court:

- a. compensatory damages according to proof including, but not limited to:
 - i. costs and expenses related to the past, present, and future investigation, sampling, testing, and assessment of the extent of PFAS contamination of Plaintiff's drinking water sources and wells;
 - ii. costs and expenses related to past, present, and future treatment and remediation of PFAS contamination at Plaintiffs' wells; and
 - iii. costs and expenses related to past, present, and future installation and maintenance of filtration systems to assess and evaluate PFAS at Plaintiff's wells;
 - iv. costs and expenses related to infrastructure modifications, contingency planning, public notice and outreach and any other past, present and future actions taken by Plaintiff to address PFAS contamination.
- b. an order barring the transfer of DuPont's liabilities for the claims brought in this Complaint;
- c. an award of punitive damages in an amount sufficient to deter Defendants' similar wrongful conduct in the future;
- d. an award of consequential damages;
- e. an order for an award of attorney fees and costs, as provided by law;
- an award of pre-judgment and post-judgment interest as provided by law; and
- an order for such other relief the Court deems just and proper.

DEMAND FOR JURY TRIAL

Plaintiff, the Village of Johnson City, demands a trial by jury of all issues so triable as a matter of right.
